JUL 24 2015

Dennis J. Aurand, M.S.
Radiation Safety Officer
Munson Healthcare Grayling Hospital
1100 East Michigan Avenue
Grayling, MI 49738

Dear Mr. Aurand,

Enclosed is Amendment No. 28 to your NRC Material License No. 21-16489-01 in accordance with your request.

We noted that your letter dated June 2, 2015, received June 19, 2015, with attachment, requested that we add C. David Phelps, Jr., M.D. to your license as an authorized user for materials in 10 CFR 35.100, 35.200 and 35.300.

Although Dr. Phelps is authorized for these materials on the referenced license, and we added him to your license for the use of materials in 10 CFR 35.100 and 35.300, we could not authorize him for the use of materials in 10 CFR 35.300 on your license. This is because your license does not authorize the use of materials in 10 CFR 35.300.

Your letter did not request the addition of materials in 10 CFR 35.300 to your license, including specification of a possession limit and supporting information. We assumed that it was not your intention to add materials in 10 CFR 35.300 to your license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please contact me at 630-829-9841 if you have any questions regarding this amendment. My fax number is 630-515-1078.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order

suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".

Colleen Carol Casey
