General Comment

Expanding a nuclear power plant in this area makes no sense to me. It is in Hurricane Alley, it's at ground zero for sea level rise in the US, it is a beautiful tourist attraction, it is a delicate ecosystem, and the area is already suffering from salt water intrusion that will presumably only be exacerbated by these new units. FPL needs to invest heavily and seriously in safer forms of energy such as wind and solar; not double down on dangerous or dirty methods in a heavily populated area encompassing and adjacent to delicate ecosystems that are supposed to be being restored not further endangered.
