Subject: [External_Sender] Docket ID NRC-2015-0057

Dear Sirs/Mesdames:

I have read that the NRC has received petitions to reverse it's previous ruling that no radiation is good for human health. Yet the truth of the matter is that zero radiation is good for the human body. This will not change because certain powers wish to expose us to ever more radiation. This will not change if the NRC changes it's rulings. The NRC needs to protect us MORE, not less.

In the UK it has been determined that breast cancer is much higher downwind of nuclear power plants. All of us are already exposed to large amounts radiation. The background radiation keeps rising and rising. No longer—since Fukushima—are radiation levels even published for the American people. The statistics have suddenly become hidden. But those of us with ways of measuring know that radiation levels are rising.

Low levels of radiation are bad for us. That will not change from wishful thinking, from the wishes of government entities or corporate interests. Radiation is harmful. And we already have been exposed to much too much. Our DU shells have ruined the middle east. Birth defects are way up in areas where US weapons were deployed. American soldiers who were around DU shells have suffered ill effects and have had children with birth defects. Birth defects are not healthy.

Please do not allow the petitions to change your previous thinking about radiation. Nothing has changed in the body. Radiation is poison. PLEASE protect us from those who wish you to change the standards. Please.

Thank you.
