Subject: [External_Sender] Docket Numbers. PRM-20-28, PRM-20-29, and PRM-20-30

To the members of the NRC:

The petitions to change the "Standards for Protection Against Radiation" regulations from the Linear No-Threshold model to the radiation hormesis model is unbelievable. Low levels of ionizing radiation is NOT beneficial, it is extremely dangerous. Research has proven this.

I urge you to reject, deny, and oppose those petitions in every way possible. Standards should be made stricter. People die from the effects of low levels of ionizing radiation. Stop this insanity. The radiation hormesis model is wrong. Oppose it.

Sincerely,

Anne Kearns
