PAHRUMP VALLEY PUMPAGE INVENTORY FIELD NOTES FOR CALENDAR YEAR 2013 70

ABSTRACT

This inventory represents the status and pumpage of all permitted, certificated and claims of vested right groundwater rights located within Pahrump, Hydrographic Basin 10-162, for calendar year 2013 (January 1, 2013 through December 31, 2013). Also included is data associated with depth to groundwater.

The data presented are valid for the time period of this report, and may vary from previously published data as water rights within the basin are subject to administrative action, such as certification, cancellation, forfeiture, or withdrawal on a daily basis.

For calendar year 2013 the permitted, certificated and claims of vested right groundwater rights totaled **55,482 acre-feet**. Estimated pumpage for the calendar year was **14,355 acre-feet**. Pumping by exempt domestic wells is the largest manner of use within the basin. For calendar year 2013, pumpage from domestic wells was 5,502 acre-feet. Exempt domestic wells are defined by Nevada Revised Statues 534.013 and do not require a permit issued by the State Engineer. The next largest manner of use was municipal supply; during calendar 2013, appropriations for municipal supply totaled 31,287 and pumpage was 4,106. For calendar year 2013, appropriations for irrigation supply totaled 14,204 acre-feet and pumpage was 3,466 acre-feet.

NOTE: Appropriation totals by Manner of Use data are accurate for June 2013. Manner of use category totals vary over time, as water rights (rights) are not necessarily static. Rights may be subject to change applications, certification, withdrawals, forfeiture and cancellations; each of these circumstances could impact the duty, diversion rate and acreage associated with a given right. The amount associated with each manner of use category does not include those portions that have been relinquished in support of exempt domestic wells. A total of 7,301 acre-feet have been relinquished in the basin.

*Includes pumpage by exempt domestic wells, as defined by NRS 534.013. The domestic use estimate is based upon a count of the total domestic wells in the basin multiplied by 0.5 acre-foot per annum. The number of domestic wells in the basin was estimated by a query of the Nevada Division of Water Resources' Well Log Database at 11,004.

**Committed Groundwater Resource is the sum of the permitted, certificated and claims of vested right groundwater rights, (55,482 acre-feet) plus the amount of groundwater relinquished to the basin in support of future domestic wells (7,301 acre-feet).

PURPOSE AND SCOPE

The purpose of this report is to inventory all of the groundwater resources allocated and described by the Office of the State Engineer, Nevada Division of Water Resources, and to estimate the amount of groundwater pumped within the Pahrump Valley Hydrographic Basin 10-162, for the calendar year beginning January 1, 2013 and ending December 31, 2013 (hereafter referred to as calendar year 2013). This report estimates the amount of groundwater pumped under the permits and certificates issued by the State Engineer, claims of vested right, and the amount pumped by exempt domestic wells within the basin. Associated information, such as groundwater level measurements are also presented.

DESCRIPTION OF THE STUDY AREA

Pahrump Valley is a basin located in southern Nevada that straddles the Nevada and California state borderline. The valley is approximately 70 miles west of Las Vegas, Nevada, and is within the Central Hydrographic Region. The town of Pahrump is the principal community. The Nevada portion of the basin (approximately 789 square miles) lies within Clark County, Nye County and the California portion of the basin (approximately 145 square miles) lies within the Inyo County (see Figure 1). The entire basin covers approximately 934 square miles.

Pahrump Valley is bounded on the east and northeast by the Spring Mountain Range. This range rises to about 11,000 feet (all elevations in this text are above mean sea level) and is the basin's primary watershed. The basin is bounded by the Resting Springs and Nopah Ranges on the west and northwest and by the Kingston Range on the south. The bordering mountains within California range in elevation from about 6,400 feet in the Nopah Range and about 7,300 feet in the Kingston Range. The valley floor elevation is just over 2,450 feet at the lowest point. The southern and southeast boundaries are formed by a low alluvial rise and intermittent hills separating Pahrump Valley from Mesquite (Sandy) Valley. The adjacent Nevada hydrographic basins are as follows: Amargosa Valley, 14-230, to the northwest; Indian Springs Valley, 10-161, to the northeast; Las Vegas Valley 13-212, to the east; and Mesquite (Sandy) Valley 10-163, to the south. The designated areas of the Pahrump Valley Hydrographic Basin are described by Orders 176, 193 and 205 issued by the Nevada State Engineer on March 11, 1941, January 15, 1948 and January 23, 1953, respectively.

Groundwater Levels

Depths to groundwater in Pahrump Valley have been measured by the Nevada Division of Water Resources consistently since the early 1950's. There are five (5) active sites and ninety-four (94) inactive sites in the monitoring well network. The following are the site names and links to the data (refer to Figure 2 for monitoring well locations):

162 S19 E53 15DB 1	162 S20 E52 36BD 1	162 S22 E53 01DA 1
162 S19 E53 27DD 1	162 S21 E54 10AAC 1	

Groundwater level data are currently being collected by the USGS (data may be accessed through the USGS website http://nevada.usgs.gov/).

METHODS TO ESTIMATE PUMPAGE

This report estimates the amount of groundwater pumped under the permits and certificates issued by the Nevada State Engineer as well as claims of vested right and exempt domestic wells in the Pahrump Valley Hydrographic Basin. The following methods were used to arrive at the estimated use:

- Where totalizing meters are in place, meter readings were taken and compared with previous data (if available).
- Where meters were not in place and the use was irrigation, pumpage was estimated by multiplying the number of hours the well was operated during the past year (determined from an hour meter reading or asking the water user) by the certificated diversion rate.
- Where meters were not in place, use was irrigation, and the number of hours the well was operated was unknown an inspection of the place of use was done to estimate the amount of acreage under cultivation. The number of acres under cultivation was then multiplied by a duty of 5 acre-feet per acre to estimate the use.
- Where meters were not present, previous data were not available, and the manner of use was not irrigation, pumpage was estimated by applying the annual duty associated with the certificate (if the water right was perfected), permit or claim, if the use was as described in the certificate, permit or claim. If the use was not as described in the certificate, permit or claim, a value was estimated based upon the circumstances of use for the subject year.
- If no water was used under the certificate, permit or claim, zero pumpage was recorded.
- Exempt domestic wells may be drilled and utilized where water service from a purveyor is not available. These types of wells do not require a permit from the State Engineer and are limited to a maximum of 2 acre-feet per year as provided by Nevada Revised Statutes (NRS) 534.180. NRS 534.013 defines this category of domestic use as follows: *"Domestic use or domestic purposes extends to culinary and household purposes directly related to a single family dwelling, including, without limitation, the watering of a family garden and lawn and the watering of livestock and any other domestic animals or household pets."* The number of exempt domestic wells in the basin is determined by a query of the Nevada Division of Water Resources' Well Log Database. The amount of water pumped by exempt domestic wells is estimated to be 0.5 acre-foot per well in Pahrump Valley. Actual domestic well pumpage is not known.

PUMPAGE BY MANNER OF USE

Note that all data herein are estimates and are subject to revision. The total estimated groundwater pumpage for calendar year 2013 was **14,355 acre-feet,** this includes 8 acre-feet of groundwater that was pumped without benefit of a permit issued by the State Engineer**.** The annual duties of the certificates, permits and claims of vested right within the Pahrump Valley Hydrographic Basin totaled **55,482 acre-feet**. The appropriated and actual pumped totals, categorized by manner of use, are as follows:

A. Municipal (MUN)

During calendar year 2013, appropriations for municipal totaled 31,287 acre-feet in the basin. Utilities Inc. of Central Nevada is the largest purveyor of municipal water in the basin. As a condition of the permits issued by the State Engineer, Utilities Inc. of Central Nevada reports monthly pumping totals on a quarterly basis. These reported amounts are used directly in this report. An estimated 4,106 acre-feet of groundwater was pumped during calendar year 2013.

B. Irrigation (IRR)

During calendar year 2013, appropriations for irrigation purposes totaled 14,204 acre-feet in the basin. An estimated 3,466 acre-feet of groundwater was pumped during calendar year 2013.

C. Quasi-Municipal (QM)

During calendar year 2013, appropriations for quasi-municipal purposes totaled 8,175 acre-feet in the basin. An estimated 443 acre-feet of groundwater was pumped during calendar year 2013.

D. Domestic (DOM)

During calendar year 2013, appropriations for domestic purposes totaled 2 acre-feet. No pumping was reported under this one certificate. During calendar year 2013, records of the State Engineer show there were 11,004 exempt domestic wells within the basin. The amount of water pumped by these wells is estimated to be 5,502 acre-feet.

E. Commercial (COM)

During calendar year 2013, appropriations for commercial purposes totaled 1,035 acre-feet in the basin. An estimated 498 acre-feet of groundwater was pumped during calendar year 2013.

F. Recreation (REC)

RE: 4th QUARTER 2005 REPORT
BARRICK BULLFROG INC.

Gentlemen:

Enclosed you will find consumption statistics in accordance with water appropriation permit 61413 for the year ended December 31, 2005. Also attached you will find a spreadsheet illustrating the static water levels recorded from the wells that Barrick continues to monitor.

Please note that the water appropriation permit 61413 / Certificate 16385 was conveyed to the Beatty Water and Sanitation District on October 24, 2005. Therefore, beginning in 2006, Barrick will no longer report the Beatty Water and Sanitation District's usage.

Please also note that the infiltration basins were reclaimed during the 3rd quarter 2005. Therefore, beginning in 2006, Barrick will no longer report infiltration basin monitoring.

Also enclosed you will find a letter from Mr. Greg Lang, President of Barrick Bullfrog Inc., designating myself as the representative and primary contact person for matters pertaining to Bullfrog.

If you have questions or require further information please do not hesitate to contact me at 801-419-3115.

Sincerely,

Melissa Ann Monk
