MEMORANDUM FOR: L. G. Hulman, Chief
Hydrology-Meteorology Branch, DSE

FROM: Terry L. Johnson, Hydraulic Engineer
Hydrologic Engineering Section
Hydrology-Meteorology Branch, DSE

THRU: William S. Bivins, Leader
Hydrologic Engineering Section
Hydrology-Meteorology Branch, DSE

SUBJECT: SITE VISIT TO OCONEE STATION, UNITS 1, 2 AND 3

The site visit to the subject plant took place on July 12, 1978. The purpose of the visit was to view the areas of the chemical waste disposal ponds. This would then aid in the determination of the feasibility of using them to dispose of certain wastes and to help in evaluation of monitoring requirement which may be imposed. I was accompanied by Mr. R. Lo (DOR) on this visit.

Accompanied by representatives of Duke Power Company and Oconee Station, we viewed the waste ponds, the furthest downstream oil waste pond, and Keowee Dam. After the tour, we met with Duke Power Company representatives, who answered some of our questions regarding the waste ponds.
