Subject: Acceptance Review - Relief Request T-1, Comanche Peak Nuclear Power Plant, Unit1 and 2 (TAC Nos. MF6405 and MF6406)

The purpose of resending this e-mail is to make a correction to the Unit 2 TAC No.

Tim,

By letter dated June 30, 2015, Luminant Generation Company LLC submitted a relief request for Comanche Peak Nuclear Power Plant, Units 1 and 2 for application of an alternative for the frequency specifications to the American Society of Mechanical Engineers OM Code. The purpose of this e-mail is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this relief request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed change in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

If you have any questions, please contact me.
