**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
WASHINGTON, D.C. 20555-0001

November 13, 1996

ORGANIZATION: Duke Power Company

SUBJECT: SUMMARY OF MEETING BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION AND DUKE POWER REPRESENTATIVES CONCERNING THEIR PROPOSALS FOR IMPROVING THE FORMAT AND CONTENT FOR OLRP-1001 (TAC NOS. M96277, 96278, 96279)

On November 5, 1996, the Nuclear Regulatory Commission (NRC) staff met with representatives of the Duke Power Company to discuss their proposal for correcting the format and content deficiencies in their first license renewal technical information topical report (OLRP-1001) identified by the staff on September 18, 1996. The list of meeting attendees is contained in Attachment 1.

The meeting started with Mike Tuckman of Duke power explaining the goal Duke expects to achieve in their license renewal topical report review process. Specifically, Mr. Tuckman stated that Duke is expecting to get a sense of what it will take to seek a renewed license and establish enough predictability and stability in the staff's review process such that Duke can make a decision regarding whether to seek a renewed license by early 1998.

Duke representatives then presented the staff with their proposed generic format and content specification document for their first submittal of OLRP-1001 that they believe addresses the staff's concerns expressed in September. Additionally, Duke presented specific examples of the implementation of their format and content specification document. Duke requested that the staff review these documents and provide them feedback as to whether or not they are nearer to meeting the staff's expectations regarding format and content such that staff reviews could begin. Duke's specification document and implementation examples are contained in Attachment 2.

Tim Martin, of the NRC staff, thanked Duke for their efforts in preparing the specification document and implementation examples and stressed the importance of such efforts in assisting the staff with developing the necessary review guidance for license renewal application. Mr. Martin stressed that many of the level of detail areas are very new to the staff and as such the staff does not yet have all the answers regarding specifically what it needs to have in an application to support its reviews and therefore efforts with BGE, NEI, and Duke play an important role in the ultimate guidance that will be adopted. Mr. Martin stated that the staff's license renewal review resources are strained but committed to get back to Duke shortly regarding what review

schedule the staff could support, possibly similar to the review being conducted currently with BGE. Duke stated that they would be able to support site visits by the staff and periodic senior management meetings to assess the progress of reaching the correct format and content in their license reports.
