Dear Secretary,

Dear NRC Commissioners and Staff:

NRC's Radiation Standards, 10 CFR 20, allow too much radioactivity to be released from the nuclear power fuel chain, its uranium mills, fuel factories, waste dumps and processors. Reduce allowable radioactive releases, doses and risks.

The cancer risks from the current standards are too high, especially for women, children and babies. Pay attention to the danger to our gene pool and reproductive phase of our lifecycle.

1)Reduce the legal radioactivity permitted to be released into air and water; never increase them again. . .

2)Stop the additional radioactive releases to sewage. . .

3)Protect the most vulnerable. . .

4)It's time to acknowledge radiation causes health problems other than cancer and protect against those as well: including heart disease, reduced immunity, mental retardation and more.

5)If you don't make the radiation rules stronger for us, our kids, our DNA and for nuclear workers, don't change them at all.

6)Don't refer to copyrighted documents. Release or rewrite the explanation for all changes so you can make them public. People should not have to pay hundreds of dollars to see what's being considered.

Additional note: Sixty years ago, my father, Dr. Earle Reynolds, produced an official report for the U.S. Atomic Energy Commission on the effect of nuclear radiation on the children of Hiroshima and Nagasaki. The AEC immediately slapped a security level on it so high that my father himself couldn't quote it. Then they lied to the public about the actual findings for years. I have followed further deceptions from both the nuclear industry and the regulatory agencies for decades. PLEASE BREAK THE CHAIN AND TELL US THE TRUTH FOR ONCE!

Ted Reynolds
