Dear Secretary,

Dear NRC Commissioners and Staff:

In regards to NRC's Radiation Standards, I ask that you lean toward our safety rather than toward corporate requests. In the past we had been told radioactivity was safer than it actually was. The people in charge back then possibly had no way of knowing better. That may well be true now. If there may be error, please for our lives' sake, let it be on the side of safety and health.

Douglas Long

Rio Rancho, NM 87124
