

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

JUL 28 2015

James C. Hatten
Radiation Safety Officer
Indiana University Health LaPorte Hospital
1007 Lincolnway
LaPorte, IN 46350-0250

Dear Mr. Hatten:

Enclosed is Amendment No. 50 to your NRC Material License No. 13-15151-01 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

As discussed with you during a phone conversation on July 7, 2015, based on the training documentation provided for Dr. Markiewicz, M.D., we will only be able to list him as an authorized user for 10 CFR 35.100, 35.200, and 35.300, limited to the oral administration of sodium iodide I-131 at this time. If you would like to add additional authorizations for 10 CFR 35.300, please submit an amendment request and provide a preceptor for the additional training and experience required.

In addition, please note that the expiration date listed on the license was incorrect and has been updated to August 31, 2024.

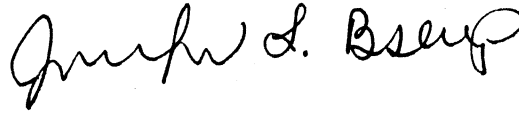

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "Jennifer L. Bishop". The signature is fluid and cursive, with the first name "Jennifer" being more prominent than the last name "Bishop".
