Offsite Dose Calculation Manual (ODCM) Revisions

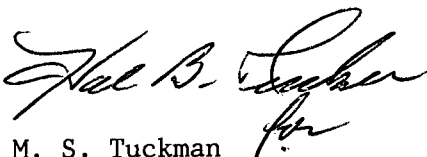

Gentlemen:

This letter is in response to a February 8, 1991 letter from the NRC transmitting the results of the staff review of the Duke Power Company (Duke) Offsite Dose Calculation Manual (ODCM). The referenced NRC letter identified two significant deficiencies and 17 other deficiencies which were noted in the previous NRC review that have not been fully corrected. The NRC requested that the two significant deficiencies be addressed within six months from the date of the letter in a revision to the ODCM, and the remaining unresolved items be considered for inclusion in future revisions to the ODCM.

Duke has initiated development of revisions to the ODCM in regards to the two significant deficiencies and other deficiencies identified in the referenced NRC letter. Based on progress to date and a further analysis of the effort required to correct these deficiencies, Duke has determined that more time is necessary to complete the revision package than allowed for by the NRC staff. However, I anticipate that specific revisions to the ODCM addressing the two significant deficiencies will be prepared and submitted to the NRC along with other revisions by January 31, 1992.

Should you have further questions, please contact M. A. Haghi of my staff at (704) 373-4060.

Very truly yours,

M. S. Tuckman
