Offsite Dose Calculation Manual (ODCM) Revisions

On February 8, 1991, the NRC transmitted the results of the staff review of the Duke Power Company (Duke) Offsite Dose Calculation Manual (ODCM). The review identified two significant deficiencies and 17 other deficiencies which were noted in an earlier NRC review that have not been fully corrected. The two significant deficiencies were to be addressed within six months from the date of the letter in a revision to the ODCM, and the remaining unresolved items be considered for inclusion in future revision to the ODCM.

As stated in our August 6, 1991 letter, we are proceeding to address these deficiencies and the resultant revisions to the ODCM. However, we find that we need additional time to complete these actions. We will make every effort to issue these revisions so that they will coincide with the submittal of the Semi-Annual Radiological Effluent Release Report due to NRC shortly.

Should you have any questions, please contact L. B. Jones of my staff at (704) 373-2102.

Very truly yours,

Hal B. Tucker
