Subject: [External_Sender] RE: PRB Initial Recommendation for SACE 2.206 Petition regarding St. Lucie Unit 2 Steam Generator Replacement

Thank you, Farideh. SACE has no new information to add to the documents already filed. Therefore we do not seek an opportunity to address the PRB.

Diane

Subject: PRB Initial Recommendation for SACE 2.206 Petition regarding St. Lucie Unit 2 Steam Generator Replacement
Importance: High

Ms. Diane Curran
Harmon Curran Spielberg & Eisenberg LLP
Counsel for SACE

Dear Ms. Curran,

This is a follow up to my voice mail that I left for you today, in reference to the petition you submitted on behalf of the Southern Alliance for Clean Energy (SACE) on March 10, 2014, regarding St. Lucie plant, Unit 2 steam generators replacement. You initially filed the petition as a request for a hearing. However, the Commission, by a Memorandum and Order (CLI-14-11) dated December 19, 2014, referred your request to the Executive Director for Operations for disposition under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.206.

The NRC has established a Petition Review Board (PRB) to review your petition. The PRB met internally on March 25, April 29, and May 20, 2015, to discuss your petition with respect to the criteria for review and rejection described in Management Directive (MD) 8.11, "Review Process for 10 CFR 2.206 Petitions." Based upon that review, the PRB initially recommended that your request partially meets the criteria for review under 10 CFR 2.206.

The parts of the petition that met the criteria for rejection per MD 8.11 rejection criterion 2 are the concerns related to the inspection of the replacement Steam Generators (SGs), as well as the concerns regarding the effects of the extended power uprate on SG tube inservice inspection and flow-induced effects on the SG internals. These items do not meet the criteria for review under 10 CFR 2.206 since they have already been reviewed and evaluated by the NRC staff. However, the PRB determined that part of your petition that addresses SACE's concerns regarding the licensee's application of the 50.59 process with respect to the change in a methodology as described in the Updated Final Safety Evaluation Report

meets the criteria for acceptance of a petition under 10 CFR 2.206. The NRC staff is currently reviewing the licensee's 50.59 evaluation of SG replacements.

Per MD 8.11, we are offering you another opportunity to address the PRB, if you have additional information in support of your petition for the PRB to consider. Please notify me by August 7, 2015, with your availability, if you wish to address the PRB in a public meeting or via a recorded conference call. If I have not heard from you by August 7th, the PRB's recommendation will become the final recommendation and we will proceed with processing your request as recommended by the PRB. Further details regarding the PRB's final recommendation and the NRC's future actions will be provided to you in an acknowledgement letter.

I also would like to inform you that Mr. Dennis Galvin will be assigned as the petition manager for the SACE petition in September. Please do not hesitate to contact me or Mr. Galvin, if you have any questions or comments.

Regards,

Farideh
