Subject: [External_Sender] What your job is and isn't

To whom it should concern,

Your job is to protect America, its people, and the environment from the very real dangers that are inherit with nuclear energy and its waste.

Your job is not to weaken our radiation protection standards but strengthen them.

Your job is not to allow deregulation of any radioactive waste.

Your job is not interfering with states rights by preventing states from setting their own, stricter safety standards for radioactive waste.

Your job is not to allow waste dump operators to preform their own safety assessments in order to accept more kinds of waste at their sites.

Best regards
Richard Stookey
