July 17, 2015

The Nuclear Regulatory Commission is considering changes to its radioactive waste regulations. These changes would:

- *weaken radiation protection standards

- *allow deregulation of some radioactive waste

- *prevent states from setting their own, stricter safety standards for radioactive waste

- *establish a clear conflict-of-interest by allowing waste dump operators to perform their own safety assessments in order to accept more kinds of waste at their sites.

These proposed changes are unacceptable.
