Subject: [External_Sender] Braidwood Station Mussels Survey

Rick –

As we discussed by phone this afternoon, Exelon Generation had originally planned to complete the mussels survey near the Braidwood Station discharge diffuser in the Kankakee River during July or August 2015. However, during July, exceptionally high rainfall caused the river flow rate to continuously exceed 2,000 cfs (i.e., the flow rate above which conditions are unsafe for divers), and such conditions are projected to continue through August. Accordingly, the field work for the mussels survey is currently planned for September 2015, and a final report of results is projected for submittal to NRC and USFWS by mid-December 2015.

Please call if you need additional information.

Regards,

Nancy

Subject: [EXTERNAL] RE: Braidwood Fish-Mussel Survey

Nancy:

When will Exelon have the results of the Braidwood fish-mussel survey and when can you provide us the final results. I also left you a phone message.

Thank you,

Rick Baum, Braidwood Project Manager

301-415-0018.
