Importance: High

Betsy – I just received the hardcopy of our approved, amended license and when reviewing it for errors noted a problem. We requested 15 mCi per source but the sealed source Model # was added to an existing item number on our license that only allows 10 mCi per source. The source our PI needs to order is 15 mCi. Can this be corrected please? Thanks for your attention. Sorry to be a pest on a Friday! Let me know if you need further information. Tammy

Here is what our submitted amendment requested:

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
Nickel 63	Sealed Sources (NRD, Inc. Model N-1001)	Not to Exceed 15 millicuries per source and 60 millicuries total

This is what our new license says:

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
Nickel 63	Sealed Source (Eckert & Ziegler Model NER-004R and NRD, Inc. Model N-1001)	Not to Exceed 10 millicuries per source and 50 millicuries total

Tammy,

Please note that this has not been administratively processed by our mail-out staff, therefore this is not yet in ADAMS or in the License Verification System. If they find any administrative errors, I will have to do a Corrected Copy if there are errors that require a change to the license.

Betsy
