## General Comment

For all of our sakes, all humanity, our children - stick to the Linear No Threshold Standards for Radiation, which is upheld by the latest National Academy of Sciences report on low level radiation, a report sponsored by the NRC itself- and the Departments of Defense, Energy, and Homeland Security and the EPA. A press release from the Health Physics Society, a pro-nuclear professional organization, cites the study and describes the dangers of even low doses of radiation (see <http://hps.org/documents/BEIRVIIPressRelease.pdf>).
