REGULATORY DOCKET FILE COPY

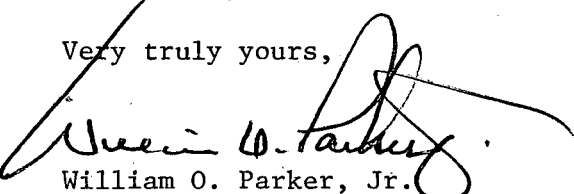

Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

In discussions with the staff, additional information was requested to supplement information submitted in my letter of January 4, 1978, which concerned a proposed license amendment to the Oconee Nuclear Station Facility Operating License. This proposed amendment would permit the area surrounding Warehouse No. 4 to be utilized by unmonitored individuals for unlimited periods of time.

In this regard, the attached information is provided.

Very truly yours,

William O. Parker, Jr.

Duke Power Company
Oconee Nuclear Station
Warehouse No. 4 Information

Attachment 1 provides the general location of Warehouse No. 4 with respect to the remainder of the station. The on contact dose rate on the exterior walls of Warehouse No. 4 is 0.62 to 1.2 mR/hr. The approximate 0.05 mR/hr boundary is denoted by the dotted line on Attachment 2. It is approximately 55 feet to the east of the building and 95 feet to the north.

Personnel entering the building are required to wear appropriate dosimetry, and protective clothing. Appropriate administrative measures are in effect to control access to Warehouse No. 4. Personnel within the 0.05 mR/hr boundary area are limited to occupancy times of no greater than five hours per week. This maximum allowable occupancy time is contained in appropriate administrative documents.

An 0.05 mR/hr boundary is designated around the warehouse and has signs posted to control area entry. The boundary is surveyed weekly to assure that levels remain less than 0.05 mR/hr. Contact readings are taken periodically to assure radiation levels do not exceed 2 mR/hr at the building exterior walls. These measures are included in appropriate administrative documents.
