Re: Oconee Nuclear Station, Unit 1
Docket No. 50-269

Dear Sir:

Pursuant to 10CFR50, §50.90, please find attached proposed changes to the Oconee Nuclear Station Technical Specifications which are required to support the operation of Oconee Unit 1 at full rated power during Cycle 6.

This proposal contains changes to the Core Protection Safety Limits, Protective System Maximum Allowable Setpoints, and Rod Position Limits of Specifications 2.1, 2.3 and 3.5.2, respectively. Also attached is a Babcock and Wilcox Report BAW-1552, "Oconee Unit 1, Cycle 6, Reload Report." This report includes a summary of Cycle 6 operating parameters and contains the safety analyses supporting the operation of the Oconee 1, Cycle 6 core at rated power in accordance with the Technical Specifications provided.

Also included in this proposal are changes to Specification 3.3, Emergency Core Cooling, Reactor Building Cooling, Reactor Building Spray, and Low Pressure Service Water Systems. These changes have been proposed to simplify the presentation of the existing specification and to incorporate the appropriate Limiting Condition for Operation for Unit 3 with the HPI cross-connect installed.

The Bases of Specification 4.1 has been revised to reflect the current practice of instrument calibration following transient conditions of operation.

The Unit 1, Cycle 6 physics test will be conducted consistent with the testing program previously described for Cycle 5.

#13,100

Mr. Harold R. Denton, Director
Page Two
August 6, 1979

This proposed revision to the Oconee Nuclear Station Technical Specifications is considered to be a Class IV amendment for Unit 1 with two Class I amendments for essentially identical Units 2 and 3. Accordingly, a check in the amount of \$13,100 is attached.

Very truly yours,

William O. Parker, Jr.

WILLIAM O. PARKER, JR., being duly sworn, states that he is Vice President of Duke Power Company; that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this request for amendment of the Oconee Nuclear Station Technical Specifications, Appendix A to Facility Operating Licenses DPR-38, DPR-47, and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

William O. Parker, Jr., Vice President

Subscribed and sworn to before me this 6th day of August, 1979.

Notary Public
