Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

In my letter of January 23, 1979 I described the background and development of the Once Through Steam Generator Inservice Inspection Technical Specification attached thereto. After further discussions with members of your Staff it was determined that further changes to the proposed specifications would be required. Therefore, in response to those requests and pursuant to 10 CFR 50, §50.90, the attached proposed Technical Specification is respectfully submitted. Whereas this request supplements numerous previous submittals for which license fees have been provided, no further fees are attached.

Very truly yours,

William O. Parker, Jr.
