Mark McGuckin, Supervisor

## SUBJECT

The inspector contacted the licensee for clarification of information provided in the licensee's letter to the NRC dated August 7, 2015.

## SUMMARY

1. The licensee's letter dated August 7, 2015, states that a gauge package had only one label; however, the inspector identified that the package had no labels. During this telephone call, the licensee did not dispute that the package had no labels.
2. The licensee's letter dated August 7, 2015, indicates that the blocking and bracing violation occurred because a different vehicle was used for the demonstration during the inspection. During this telephone call, the licensee confirmed that the demonstration was conducted in accordance with what happened when the gauge was transported on June 18, 2015, in accordance with the NRC Inspection Report dated July 29, 2015.
3. The licensee's letter dated August 7, 2015, includes pictures of how they are now blocking and bracing gauge packages during transport. Some of the pictures show the tailgate open. During this telephone call, the licensee confirmed that the tailgate is closed during transportation, and the open tailgate pictures were intended to provide a better view of the package.

## ACTION REQUIRED

Recommend that EICS include the above information in the NRC's next written correspondence
