Subject: Oconee Nuclear Station
Docket Nos. 50-269,-270,-287
Submittal of Topical Report BAW-10191P, "STAR System
Components for Reactor Protection System Digital
Upgrades"

By letter dated January 14, 1993 I informed the NRC of the plans and schedule for demonstration of the "STAR" module developed by B&W Nuclear Technologies. STAR is designed to be a digital safety related module for use in safety systems at nuclear power plants. On July 19, 1993 B&W Nuclear Technologies submitted the proprietary topical report BAW-10191P, "STAR System Components for Reactor Protection System Digital Upgrades". NRC approval of this topical report is required by approximately June 1994 in order to support the planned installation schedule.

Very Truly Yours,

J. W. Hampton
