Thermal/Hydraulic Statistical Core Design Methodology,
DPC-NE-2005

By letter dated September 28, 1992, Duke Power Company submitted Topical Report DPC-NE-2005, "Thermal/Hydraulic Statistical Core Design Methodology." The NRC staff issued a request for additional information (RAI) dated July 27, 1993. Attached are the responses to the questions contained in the RAI.

In accordance with 10 CFR 2.790, Duke Power Company requests that the attached information relating to DPC-NE-2005 be considered proprietary. Information supporting this request is included in the affidavit which appears as Attachment I.

If we can be of assistance in your review please call Scott Gewehr at (704) 382-7581.

Very truly yours,

M. S. Tuckman

ATTACHMENT I
AFFIDAVIT OF M. S. TUCKMAN

1. I am Senior Vice President, Nuclear Generation Department, Duke Power Company ("Duke"), and as such have the responsibility of reviewing the proprietary information sought to be withheld from public disclosure in connection with nuclear plant licensing, and am authorized to apply for its withholding on behalf of Duke.
2. I am making this affidavit in conformance with the provisions of 10 CFR 2.790 of the regulations of the Nuclear Regulatory Commission ("NRC") and in conjunction with Duke's application for withholding which accompanies this affidavit.
3. I have knowledge of the criteria used by Duke in designating information as proprietary or confidential.
4. Pursuant to the provisions of paragraph (b)(4) of 10 CFR 2.790, the following is furnished for consideration by the NRC in determining whether the information sought to be withheld from public disclosure should be withheld.
 - (i) The information sought to be withheld from public disclosure is owned by Duke and has been held in confidence by Duke and its consultants.
 - (ii) The information is of a type that would customarily be held in confidence by Duke. The information consists of analysis methodology details, analysis results, supporting data, and aspects of development programs, relative to a method of analysis that provides a competitive advantage to Duke.
 - (iii) The information was transmitted to the NRC in confidence and under the provisions of 10 CFR 2.790, it is to be received in confidence by the NRC.
 - (iv) The information sought to be protected is not available in public to the best of our knowledge and belief.
 - (v) The proprietary information sought to be withheld in this submittal is that which is marked in the proprietary version of the report DPC-NE-2005, "Thermal/Hydraulic Statistical Core Design Methodology" and supporting documentation, and omitted from the non-proprietary versions.

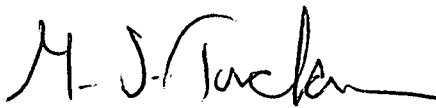

M. S. Tuckman

(continued)

AFFIDAVIT OF M. S. TUCKMAN

This information enables Duke to:

- (a) Respond to Generic Letter 83-11, "Licensee Qualification for Performing Safety Analyses in Support of Licensing Actions."
 - (b) Respond to NRC requests for information regarding the transient response of Babcock & Wilcox and Westinghouse reactors.
 - (c) Support license amendment and Technical Specification revision request for Babcock & Wilcox and Westinghouse reactors.
- (vi) The proprietary information sought to be withheld from public disclosure has substantial commercial value to Duke.
- (a) It allows Duke to reduce vendor and consultant expenses associated with supporting the operation and licensing of nuclear power plants.
 - (b) Duke intends to sell the information to nuclear utilities, vendors, and consultants for the purpose of supporting the operation and licensing of nuclear power plants.
 - (c) The subject information could only be duplicated by competitors at similar expense to that incurred by Duke.
5. Public disclosure of this information is likely to cause harm to Duke because it would allow competitors in the nuclear industry to benefit from the results of a significant development program without requiring a commensurate expense or allowing Duke to recoup a portion of its expenditures or benefit from the sale of the information.

M. S. Tuckman
