SUBJECT: REVIEW OF FACILITY CHANGES AND THE INTEGRATED SAFETY
ANALYSIS SUMMARY ANNUAL UPDATE FOR CALENDAR YEAR 2014
(TAC L33369)

Dear Mr. Tate:

This letter is in reference to your letter dated January 27, 2015, which transmitted a list of facility changes made to the AREVA Inc., Richland facility during calendar year 2014. Our review of your submittal did not identify any non-compliances with the requirements of Title 10 of the *Code of Federal Regulations* (10 CFR) 70.72, and did not identify any changes that would require prior U.S. Nuclear Regulatory Commission (NRC) approval. We have no further questions at this time; however, an inspection may be performed at a future date, in accordance with our inspection schedule.

In future submittals of annual 10 CFR 70.72 internally authorized facility changes, we recommend that you continue to indicate: (1) if a change was physically made to a structure, system, or component, and (2) the document(s) modified due to the change. This will facilitate a more efficient risk-informed review.

This letter indicates the completion of our review and closes Technical Assignment Control Number TAC L33369.

If you have any questions regarding this letter, please contact the Soly I. Soto at (301) 415-7528 or via e-mail at Soly.Soto@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or will be publicly available in the NRC Agencywide Documents Access and Management System (ADAMS).
