General Comment

PLEASE APPROVE the Turkey Point license for two new nuclear plants! Their construction will improve the environment and ensure the future of the manatee habitat, this helping preserve the manatees. They will also improve the human habitat and reduce center deaths and health costs caused by air pollution from the alternative fossil fuels. They reduce CO2 emissions reducing ocean acidification damage to the ocean environment. Nuclear has a proven BEST safety record both for any energy production method already, and new plants will further improve the safety record, while also saving people money by reduced electricity and Healthcare costs.
