In less than a month after Fukushima's meltdowns, PA governor RAISED the radiation exposure limit for children 10X higher! TPP would make it MANDATORY that we buy radioactive foods that Japan has banned ~ or be SUED! The capacity for heinous cruelty by corporate corpses is matched only by that of regulators who turn their attentions away from these facts. As Mark Twain said, "Facts is stubborn things."

I believe the most vulnerable are unprotected and especially wish that patients with injected isotopes be confined and not allowed in public places eg: in line at store or out at restaurants, etc.

I grew up in the sacrifice zone of a nuke plant, as did my son. 4 people in my family of 5 had cancer.

A developing embryo (human or other) is terribly vulnerable to the negative effects of nuclear radiation. Regulate strictly to protect the unborn and prevent untoward health effects.

There is no crime worse than subject children to known carcinogens and immune busting man-made radiation. PROTECT them through wise decision-making. Remember Chernobyl.
