Rockville, MD 20852-2738

Serial No. 15-333  
NL&OS/GDM R0  
Docket Nos. 50-336/423  
50-338/339  
50-280/281  
License Nos. DPR-65/NPF-49  
NPF-4/7  
DPR-32/37

**DOMINION NUCLEAR CONNECTICUT, INC. (DNC)**  
**VIRGINIA ELECTRIC AND POWER COMPANY (DOMINION)**  
**MILLSTONE POWER STATION UNITS 2 AND 3**  
**NORTH ANNA AND SURRY POWER STATIONS UNITS 1 AND 2**  
**NRC GENERIC LETTER (GL) 2004-02, POTENTIAL IMPACT OF DEBRIS**  
**BLOCKAGE ON EMERGENCY RECIRCULATION DURING DESIGN BASIS**  
**ACCIDENTS AT PRESSURIZED-WATER REACTORS**  
**COMMITMENT CHANGE**

By letters dated May 14, 2013 (ML13140A095) for Surry Power Station Units 1 and 2 and May 15, 2013 (ML13141A277 and ML13141A278) for Millstone Power Station Units 2 and 3 and North Anna Power Station Units 1 and 2, respectively, Virginia Electric and Power Company (Dominion) and Dominion Nuclear Connecticut, Inc. (DNC) notified the NRC that they would be implementing GSI-191 Closure Option 2A-Deterministic for each plant to address the downstream in-vessel debris effects issue associated with resolution of GL 2004-02. These letters also included regulatory commitments for providing resolution plans and implementation schedules to the NRC for resolving downstream in-vessel debris effects within 60 days of the Pressurized Water Reactor Owners Group (PWROG) establishing new in-vessel debris acceptance criteria.

By letter dated July 17, 2015, the PWROG submitted WCAP-17788, "Comprehensive Analysis and Test Program for GSI-191 Closure (PA-SEE-1090)," to the NRC for review and acceptance for referencing in regulatory actions. However, developing and submitting plant-specific resolution plans and implementation schedules prior to the completion of NRC review and approval of the WCAP and issuance of an associated Safety Evaluation Report (SER) is premature and potentially could be counterproductive should the NRC not endorse the WCAP as written or impose restrictions and/or conditions not presently specified in WCAP-17788. Consequently, Dominion and DNC herein revise the regulatory commitments discussed above for Millstone Power Station Units 2 and 3 and North Anna and Surry Power Stations Units 1 and 2 as follows:

A116  
NRR

Commitment	Expected Completion Date
Dominion and DNC will develop plans for demonstrating compliance with the PWROG WCAP-17788 in-vessel debris acceptance criteria and communicate that plan to the NRC in a final updated supplemental response to support closure of GL 2004-02.	Within six months following the issuance of the NRC SER for PWROG WCAP-17788.

Should you have any questions or require additional information, please contact Mr. Gary D. Miller at (804) 273-2771.

Respectfully,

Mark Sartain  
Vice President – Nuclear Engineering

COMMONWEALTH OF VIRGINIA     )  
  )  
COUNTY OF HENRICO            )

The foregoing document was acknowledged before me, in and for the County and Commonwealth aforesaid, today by Mr. Mark Sartain, who is Vice President – Nuclear Engineering of Virginia Electric and Power Company and Dominion Nuclear Connecticut, Inc. He has affirmed before me that he is duly authorized to execute and file the foregoing document in behalf of that company, and that the statements in the document are true to the best of his knowledge and belief.

Acknowledged before me this 13<sup>TH</sup> day of August, 2015.

My Commission Expires: 5-31-18.
