SUBJECT: SALEM NUCLEAR GENERATING STATION, UNIT NOS. 1 AND 2 -
TEMPORARY INSTRUCTION 2201/004, "INSPECTION OF IMPLEMENTATION
OF INTERIM CYBER SECURITY MILESTONES 1-7," REPORT
05000272/2015404 AND 05000311/2015404

Dear Mr. Braun:

On August 7, 2015, the U.S. Nuclear Regulatory Commission (NRC) completed a security temporary instruction inspection at your Salem Nuclear Power Station. The inspection covered the implementation of interim milestones associated with your cyber security program, as outlined in your approved cyber security plan. The enclosed inspection report documents the inspection results, which were discussed on August 7, 2015, with Mr. Christopher Schwarz, Vice President Corporate Operations, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license related to the implementation of interim cyber security milestones. The inspection was conducted in accordance with NRC Temporary Instruction (TI) 2201/004, "Inspection of Implementation of Interim Cyber Security Milestones 1-7." The team reviewed selected procedures and records, observed activities, and interviewed personnel.

The report documents three violations for which the NRC is exercising enforcement discretion. The NRC is not taking enforcement action for these violations because they meet the criteria established in an NRC Memorandum from Barry C. Westreich, Director, Cyber Security Directorate, Office of Nuclear Security and Incident Response, to each regional office and Director, Division of Reactor Safety, Subject: Enhanced Guidance for Licensee Near-Term Corrective Actions to Address Cyber Security Inspection Findings and Licensee Eligibility for "Good-Faith" Attempt Discretion, dated July 1, 2013 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML13178A203). Consistent with the NRC Memorandum, upon completion of all corrective actions, you are requested to provide written notification to the NRC's regional office as to the date of closure for the identified issues.

Enclosure contains Sensitive Unclassified Non-Safeguards Information. When separated from enclosure, the transmittal document is decontrolled.
