Duke Power Company Implementation of Severe Accident Management

The purpose of this letter is to inform you that Duke Power Company intends to implement the formal industry position on severe accident management which was approved by the Nuclear Energy Institute's Nuclear Strategic Issues Advisory Committee on November 4, 1994. That formal position communicated in a letter dated November 21, 1994, from NEI to the Director, Office of Nuclear Reactor Regulation, states that each licensee will:

- Assess current capabilities to respond to severe accident conditions using Section 5 of NEI 91-04, Revision 1, "Severe Accident Issue Closure Guidelines," and
- Implement appropriate improvements identified in the assessment, within the constraints of existing personnel and hardware, on a schedule to be determined by each licensee and communicated to the NRC; but in any event no later than December 31, 1998.

Based on previous interactions between NEI (NUMARC) and NRC staff, it is understood that NRC staff agrees with the need for licensee flexibility in their methods of assessing and establishing severe accident management guidance. Utilizing the associated implementing guidance (contained in NEI Report 91-04, Revision 1), it is intended that the assessment of severe accident management capabilities and the implementation of any identified enhancements will be completed by December 31, 1997.
