Subject: Oconee Nuclear Station
Docket Numbers 50-269, -270, and -287
Technical Specification Revision to Implement Revised 10
CFR 50 Appendix J

By letter dated August 12, 1996, a change to Oconee Nuclear Station's Technical Specifications was proposed, to implement the performance-based containment leak rate testing (CLRT) requirements of 10 CFR 50 Appendix J, Option B. An additional change has been identified which more accurately reflects the intent of the new regulation. The change is consistent with the changes already submitted, and requires no additional justification. Therefore, attached is a new Page 4.4-1 which reflects the additional change. Page 4.4-2 is also included due to carryover as a result of the change.

If any additional information is required, please call Scott Gewehr at (704) 382-7581.
