Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. J. F. Stolz, Chief  
Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

My letter of September 25, 1981 stated that the results of the technical review of the Oconee purge system was expected by the end of October 1981. As indicated during a telephone conference call held with members of your Staff on October 30, 1981, Duke has not received the technical report from the purge valve vendor, and, further, it is not expected prior to the end of November.

In consideration of this delay as well as other manpower requirements, the evaluation report on the Oconee purge valves will not be submitted until January 1982 at the earliest. Concurrently, the technical specifications addressing this system are also delayed.

Very truly yours,

William O. Parker, Jr.
