Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

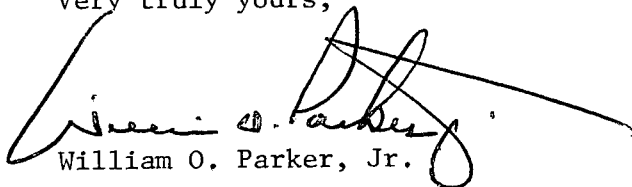

Dear Sir:

By letter dated December 1, 1981, the NRC staff requested additional information regarding the adequacy of station electric distribution system voltages.

Because of the extensive amount of effort required to respond adequately to this request and limitations on available manpower, the response to the staff has been delayed. Currently it is expected that a response to this request will be made by February 17, 1982. Also we presently do not deem a conference call as mentioned in your letter necessary prior to completion of this response.

Very truly yours,

William O. Parker, Jr.
