Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

By letter dated November 19, 1982, Duke provided the NRC Staff revisions to the Oconee inservice testing program. This letter corrects certain minor errors that were contained in the above letter.

The applicable ASME Boiler and Pressure Vessel Code is the 1980 Edition through Winter 1980 Addenda. In the table of changes to the inservice testing program attached to the above letter, two minor changes are required. Valve 1CCW-289 should be indicated as a check valve rather than stroke test and valves 1, 2, 3 HP-402 should be indicated as check valves.

If there are any questions regarding this please advise through the normal licensing channels.

Very truly yours,

*H. B. Tucker / HBT*

Hal B. Tucker
