Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

In regard to my letter of August 25, 1980, transmitting the semi-annual liquid and gaseous waste summaries, please note the following changes:

The report summarizes the period from January 1, 1980 to June 30, 1980, not June 31.

The totals for the I-135 curies released and the totals for particulates with $T_{1/2} > 8$ days were inadvertently left out. This information is required by existing Technical Specifications but not by the proposed Appendix I Technical Specifications, on which our gaseous effluent computer program is based. In order to estimate the amount of I-135 released, data was used from the 1978 and 1979 annual summaries to calculate a ratio of 8% I-135 to I-131. This additional information is in Attachment 1.

A computer error also created erroneous numbers in the "maximum concentration released" section of the liquid waste summaries. The corrected summary is in Attachment 2.

Very truly yours,

William O. Parker, Jr.
