PRODUCTION AND TRANSMISSION

P. O. Box 2178

January 30, 1981

Mr. James P. O'Reilly, Director
Region II
Office of Inspection and Enforcement
U. S. Nuclear Regulatory Commission
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
IE Bulletin 79-01B

Dear Sir:

Attached is Revision 6 to Duke Power Company's "90-day" response to the subject bulletin. This revision replaces in its entirety our previous submittal of November 1, 1980 (Revision 5). *511 8/2/81*

This revision addresses the environmental qualification of electrical equipment needed to achieve hot shutdown and cold shutdown conditions, as well as the qualification of the TMI Action Plan equipment. This latter information is provided on hand-written System Component Evaluation Work Sheets, which may be found at the end of the submittal for each Oconee unit. It should be noted that this submittal includes TMI-related equipment which is to be installed, as well as that equipment which has already been installed.

Very truly yours,

A handwritten signature in cursive script, appearing to read "A.C. Thies".
