Dear Secretary,

The Humanity of the 21st Century is AWASH IN SERIOUS RISKS!! And I often feel I would be irresponsible to point out, crudely, in various situations, "Humans suck at foresight".

The business of "deciding some level of \_\_\_\_\_ is safe" is precarious indeed. In a pro-business United States, we have been both too loose and historically tardy in this area. Further, we have gone for some regulatory agencies whose job is both to regulate and promote. Ah, naive illogic!

"OH DEAR, we chose (not) to know" rings hollow after people have been irreperably harmed. That has happened too often!!

STRENGTHEN radiation regulations!!!
