## General Comment

We strongly oppose this proposed rule! Radiation pollution assaults all future generations and must not be tolerated. The NRC should protect life on Earth and not shill for extremely dangerous and economically bankrupt nuclear power companies. Nukes were built on a stack of lies and billions in irresponsible subsidies and bailouts. Vogle is already an economic disaster and should be halted immediately before it adds to the 70 year mountain of radioactive waste that hangs like a Damocles sword over all our heads.
