General Comment

I would like to take the time to say that fukushima is a on going environmental disaster that is not being addressed

Negotiations and nuclear material

The truth is man cannot ever negotiate with nuclear material

This is uncontrollable Dangerous environmental time out literally

Fukushima is totally out of control and ignoring it is foolish mainstream policy unchecked!

Atomic is not a program it is Dangerous to the world DNA our water supply and our food supply and Man!

you talk about fixes what are they >?

suggestion(mandate) and review that every nuclear reactor be accessible by (rail)

build a train engine response platform that is a power plant on train wheels

and a pumping platform on train wheels that's is moveable to all location's with reactors, be that fix not the problem support public safety! not failure of policy
