## General Comment

Hello my name is Kevin Finnegan. Here is a quote from Richard L. Miller' book Under the Cloud "The month before the U.S News and World report articles were published, Dr E.B. Lewis, in an article that appeared in the respected Science magazine, flatly claimed that there was no safe level of exposure to radiation and the leukemia risk is in direct proportion to the radiation exposure. "(pg 302.)

Here is a quote from this New York times articles "A class action lawsuit has been filed against the Brookhaven lab, and most of the plaintiffs are from the Shirley area. The complaints range from depressed real estate values as a result of living in a contaminated area to the claim that cancers and other illnesses have resulted from the laboratorys pollution. A childrens cancer cluster by 2000 there were 19 children in the area afflicted by a rare soft-tissue cancer rings the lab like a necklace." ([http://www.nytimes.com/2006/11/12/opinion/nyregionopinions/12LI-McMasters.html?\\_r=0](http://www.nytimes.com/2006/11/12/opinion/nyregionopinions/12LI-McMasters.html?_r=0))

I will attach a picture of a page of my own high school chemistry class notes it clearly says that radiation damages DNA.

Also it is known that radioactive molecules bioaccumulate over time especially strontium 90 in the bones.

Furtermore I would love to be the test subject for this theory you can inject plutonium cesium

tritium and anything in you want into my vain got try and prove this outrageous and beyond criminal theory.
