Linear No-Threshold Model and Standards for Protection Against Radiation

Comment On: NRC-2015-0057-0010

Linear No-Threshold Model and Standards for Protection Against Radiation; Notice of Docketing and Request for Comment

Document: NRC-2015-0057-DRAFT-0145

Comment on FR Doc # 2015-15441

Submitter Information

Name: John Miller

General Comment

As I understand it, there is strong evidence for the linear no-threshold hypothesis and little evidence for the hormesis hypothesis. Please do not weaken the radiation standards of the United States until and unless there is overwhelming evidence that LNT is wrong and hormesis is correct. The proponents of hormesis just want to make nuclear power less expensive. They apparently have no concern for the consequences for human health should they be mistaken.
