

August 28, 2015

I would like to express my support for the renewal of the license of the Cameco-Crow Butte Resources Uranium mine.

I have lived on the same farm $\frac{1}{2}$ mile from White River for 53 years and do not believe there has been any contamination of the water or the soil. We have young people in our community that work for Cameco-Crow Butte Resources who are raising families which will be members of our farm and ranch community.

I have two family members who work for Crow Butte Resources so have an idea of how many tests are done everyday including weekends, nights and holidays. I believe all rules and procedures of the NRC are followed and in compliance.

Cameco-Crow Butte is very supportive of the community. I have been on several tours at the mine when they have open house events.

Our country needs nuclear energy as the regulations on fossil fuels (especially Coal) is being discussed on the news media.

Thank You
Naomi J. Galey
