

Aug 19, 2015

I am writing to express my support of the License Renewal for Cameco Crow Butte Resources of Crawford. I have lived in this area for 38 yrs, Cameco has shown us since their opening of the mine that they are trustworthy of keeping us safe from any contaminations. Our Ranch is on White River, Ash Creek as well as wells and there has never been any problems or complications with our water or environment. I have family & friends employed there and I believe in Crow Butte's safety precautions for their employees as well as the environment. I really don't understand the problems from out of the area people, when us locals trust Cameco to keep us safe & the water & land which we make our living off of. It's top priority for us all.

Nuclear energy is a valuable resource for America & Abroad. Crow Butte has extensive testing done 7 days 24 hrs. They know what they are doing.
