

August 20 - 2015

I would like to express my sincere support for the renewal of the license of the Cameco Crow Butte Resources Uranium Mine at Crawford Ne.

My family came to Daves County in 1917 & farmed & ranched just east of the mining area for 98 years and some of the family still working there.

I do not believe there is or has been any contamination of the water or soil due to the mine.

I myself is now 84 years old and have some kin & a lot of friends working at the mine & have heard many times of the numerous tests they take every day including weekends & holidays. I also believe they are following the rules & proper procedures of the NRC.

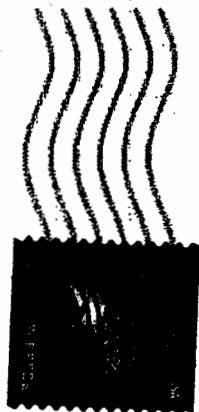

I believe Cameco-Crow Butte has done a fine job in Daves Co. I was County Assessor for 43 years and was in office when they started the mining. I spent some time over the years understanding what they were doing. I support the mine & believe they are following all rules & procedures and definitely support the license renewal. Thank you.
