

I Dyer Eaton sent a letter this week in support of the renewable license for the Crow Butte Uranium mine.

I neglected to include the following fact. In 1972 the Dawes Co Rural Water District No 1 was formed. We drilled 3 wells in the area five or six miles east of the mine plant.

Our water line was installed in 1977 and 1978. It includes 29 subscriber 85 meters and 28 miles of line to the South Dakota border.

The water is tested every month and to my knowledge as Clerk of the Water Dist. the tests that are sent to the State of Nebraska Water Office has not shown any extreme signs of contamination. 41 years.

Dyer Eaton
