Mr. Frank J. Congel
Director
Division of Radiation Protection
and Emergency Preparedness
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

AUG 23 1988

Dear Mr. Congel:

Enclosed is a copy of the final exercise report for the April 14, 1988, partial participation joint exercise of the offsite radiological emergency preparedness plans site-specific to the Oconee Nuclear Station. The Oconee Nuclear Station is located approximately eight miles north-east of Seneca in eastern Oconee County, South Carolina. The State of South Carolina and Oconee and Pickens Counties, both located in the 10-mile plume emergency planning zone, participated in the exercise.

The exercise report was prepared by Region IV staff of the Federal Emergency Management Agency (FEMA) and includes the comments resulting from the Regional Assistance Committee review. There were no deficiencies identified during this exercise. There were, however, nine areas requiring corrective action and several areas recommended for improvement.

Based on the results of this exercise, the offsite radiological emergency plans and preparedness for the State of South Carolina and Oconee and Pickens Counties remain adequate to protect the health and safety of the public in the event of a radiological emergency at the Oconee Nuclear Station. Therefore, the 44 CFR 350 approval granted to the State of South Carolina on February 23, 1983, will remain in effect.

FEMA Region IV staff will furnish a copy of this final exercise report to the State of South Carolina and will assure completion by the State of the necessary corrective actions.

If you have any questions, please contact Mr. Craig S. Wingo, Chief, Technological Hazards Division, at 646-3026.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Dennis Kwiatkowski', is written over the typed name.

Dennis Kwiatkowski
Assistant Associate Director
Office of Natural and Technological
Hazards Programs
