Dear NRC

Please do not renew application for Cameco's permit. Water Is Life. Our future generations need water to live. All living beings need water. The wells at Crawford do affect the water system. As a Rosebud Sioux Tribal member, our White River is affected, which runs into the Missouri. Our surface water used each day, at home, to cook, wash and drink is affected.

Please, I humbly request not to renew the permit.

Thank You

Leota Eastman - Iron Cloud
