Subject: Oconee Nuclear Station - Docket Nos. 50-269, -270, -287
McGuire Nuclear Station - Docket Nos. 50-369, -370
Catawba Nuclear Station - Docket Nos. 50-413, -414

Response to NRC Bulletin 88-10 and Supplement 1 of the Bulletin:
Nonconforming Molded-Case Circuit Breakers

By letters dated April 3 and 24, July 17, and November 9, 1989 I provided Duke's response to the subject bulletin and supplement. In my response, I advised the staff of actions that had been completed, and of circuit breakers at Oconee, McGuire, and Catawba Nuclear Stations that remained in service for which we had performed operability evaluations per the guidance of the bulletin/supplement. Upon completion of the refueling outages at Oconee Unit 1, McGuire Unit 1, and Catawba Unit 1 of this year, these circuit breakers have been replaced with circuit breakers that meet the requirements of the bulletin.

With the completion of these actions, we have fulfilled all of the requirements, and are in full compliance with NRC Bulletin 88-10 and Supplement 1 of the bulletin.

If there are any questions concerning this subject, please contact Steve LeRoy at (704) 373-6233.

I declare under penalty of perjury that all statements and matters set forth herein are true and correct to the best of my knowledge.

Very truly yours,

Hal B. Tucker
