Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station
Units 1, 2, and 3
Docket Nos. 50-269, -270, -287

Dear Sir:

Pursuant to 10 CFR 50 §50.90, please find attached (Attachment 1) a proposed amendment to the Oconee Facility Operating License and revisions to the Oconee Nuclear Station Technical Specifications.

The requested revisions to the Oconee Technical Specifications are administrative in nature and, as such, are of no public health or safety significance. The proposal contains changes which define the term accessible/accessibility; incorporates into the Technical Specifications additional fire hose stations located in the Reactor Building; and updates the Final Safety Analysis Report (FSAR) sections being referenced. The supporting technical justification is provided in Attachment 3.

Please note that due to the revisions made on page 3.17-3, the text for the Bases that appeared on page 3.17-3 had to be relocated to page 3.17-4. The actual context of the Bases for Section 3.17 has not changed; only its relative location within Oconee's Technical Specifications has changed.

Please find attached (Attachment 2) the No Significant Hazards Consideration evaluation. Duke has determined that the proposed amendment warrants a No Significant Hazards Consideration, since an administrative change is involved. Duke is forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the Staff.

This proposed revision to the Oconee Technical Specifications is considered to consist of one Class II and two Class I license amendments. Accordingly, pursuant to 10 CFR 170, §170.12, please find enclosed a check in the amount of \$2,000 for the applicable licensing fees.

Very truly yours,

Hal B. Tucker

HAL B. TUCKER, being duly sworn, states that he is Vice President of Duke Power Company; that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this request for amendment of the Oconee Nuclear Station Technical Specifications, Appendix A to Facility Operating Licenses DPR-38, DPR-47, and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

Hal B. Tucker, Vice President

Subscribed and sworn to before me this 13th day of February, 1984.

Notary Public
